

Oieu Zhydd V. Nuñez

Macaas, Catmon Cebu 6006 | nunezaoieu@gmail.com | (+63) 999 989 8276

Soft Skills

Strong communication | Time and Task management | weLeadership experience in group projects | Able to adapt to changing requirements | Resourceful in finding solutions to problems | Good in English, Spoken and Written

Technical Skills

Microsoft Word | Microsoft Power BI Desktop | SQL Server Management Studio | Canva | Python | Excel | ServiceNow | Ethernet Cable Creation | LAN Configuration | VLAN Configuration | DHCP Configuration | Windows Server 2022 Administration | Switch Configuration | Router Network Configuration | Cisco Packet Tracer | Linux (Kubuntu) | HTML | CSS | JavaScript | ServiceNow | ReactJS

Experiences / Projects

Configured Windows Server 2022 – used the server operating system to configure the ad hoc server, file server, and printer server to manage users, user files and printers and implemented group policies to restrict user actions in a lab set up.

Online Printing Services Web App – developed the product catalog and check out page to enable users to order items and customize their order for convenience, and homepage functionalities for users to centralize the website content and services, and integrated PayPal Checkout API for secure transactions.

School & Office Supplies Management System – developed the script for system tracking orders, inventory, and user approvals to enable communication between pages and managed the Service Portal and ACL configurations to improve system security using ServiceNow.

Configuring Switches – has done basic configurations on switches and network configuration VLAN setups, trunking, and port security in a lab set up to enable network segmentation and increase security in different departments within an organization.

Telnet and SSH set up – has configured Telnet and SSH for remote switch and router management, to enforce secure administrative connections in a lab set up.

Configuring Routers – has done basic configurations and network configurations such as DHCP, ACLs and VLAN set ups in Cisco routers in a lab set up to increase network security. Has also configured DHCP to automate IPv4 address distribution within an internal network.

Voice Direction Detector Program – Created a program in python using concepts in signals and systems such as band pass filtering, ITD and ILD together with a beamforming microphone to detect the direction of voices in a controlled environment.

Datawarehouse Project – Created a data warehouse project about the used car market in the US regions using craigslist data to gain valuable insights about the pricing, condition and supply of the market.

Educational Background

University of San Carlos Bachelor of Science in Information Technology	<i>Talamban, Cebu City</i> 2021-Present
University of San Carlos Senior High School	<i>Talamban, Cebu City</i> 2019-2021
Passionist Sister School Junior High School	<i>Catmon, Cebu</i> 2016-2019

Trainings/Seminars

CCNA: Introduction to Networks Cisco Trainee	Cisco Networking Academy 2022
CCNA: Switching, Routing and Wireless Essentials Cisco Trainee	Cisco Networking Academy 2022
CCNA: Introduction to Cybersecurity Cisco Trainee	Cisco Networking Academy 2024
Python Essential I Cisco Trainee	Cisco Networking Academy 2024
Python Essentials II Cisco Trainee	Cisco Networking Academy 2024
NC II Creative Web Design TESDA Trainee	TESDA 2023
